

SAVING FOR A RAINY DAY!

SAVE!

DID YOU KNOW?

One reason not to spend all of your money at once, is in case something unexpected happens.
Save and be prepared, Just in Case!

TODAY'S CHALLENGE

- Think of a time when something unexpected happened and a little extra money would have really helped!
 - Was it raining and you needed to get the bus?
 - Did you lose something and need to buy a new one?
- Think about how much you could save each week or month, in case of emergencies. Find a money box or container you can use to save for those rainy days. But remember, you can't touch it unless it's an emergency!
- Tell your plan to your Parents or an Adult in your house. Ask them if they also have savings for 'Just in Case' and see if they can help you save.

SAVING FOR A RAINY DAY!

This activity is designed to help your child realise the importance of saving for unexpected circumstances.
